

ISO 20121 Sustainable development policy

Essebi S.p.A.

Essebi S.p.A., a Catering & Banqueting supply company, has been operating in the sector for almost thirty years, cultivating such an experience that, in addition to an intense development of a network of professionals and suppliers, allows it to offer a service with a high standard of quality. For the design and provision of catering services, among the many realized during the years of activity, stand out collaborations with international top brands.

Essebi S.p.A., has already demonstrated considerable sensitivity towards reducing environmental impact and improving social and economic impact, with active involvement in several events of its ISO 20121 certified customers.

The decision to adopt an integrated system for the sustainable management of events, through the achievement of ISO 20121 certification, is therefore a further significant step forward in the path of environmental, social and economic sustainability, promoting the possibility of integrating perfectly, as a supplier, with the ecosystem of events, a sector that is increasingly working to make its activities respectful of sustainability criteria.

This decision leads to the implementation of the values and intentions promoted by the standard and foundations of this sustainable development policy, such as:

- Responsible management
- Inclusivity and accessibility
- Integrity
- Transparency
- Participation
- Legacy

Essebi S.p.A. intends to further enhance the provision of its services from the point of view of sustainability by stimulating every possible action in the short, medium and long term to reduce environmental impacts and, at the same time, enhancing the social and economic benefits produced by its activities before, during and after the events. This is an important and strong operation of attention to the environment and involvement of all stakeholders (staff, suppliers, customers, guests, local community, etc.).

In this perspective, Essebi S.p.A. is committed to:

- Respect the fundamental principles of sustainable development and contribute to the achievement of the goals indicated by the United Nations (UN SDGs - Sustainable Development Goals);
- Design its service taking into consideration the principles and values listed above (responsible management, inclusivity and accessibility, integrity, transparency, participation, legacy);
- Raise awareness and involve all stakeholders on the issue of environmental, economic and social sustainability;

- Reduce food waste;
- Minimize waste production and promote separate waste collection;
- Better manage natural resources;
- Guide suppliers towards sustainable choices and behaviors;
- Promote wide-ranging and up-to-date information on sustainability issues;
- Improve the direct and indirect impact on the economic and social fabric;
- Ensure access and use of its services and activities also to vulnerable people;
- Ensure compliance with applicable environmental, health, safety and labor regulations.

The sustainable development policy of Essebi S.p.A. is implemented through a specific plan of objectives and actions in order to promote the effective and lasting reduction of environmental impacts, the enhancement of social benefits and the economic impact on the territory.

Essebi S.p.A.
